

The bur for the resin made of zirconia

# Zirconia Burs

New  
proposal

ジルコニアバー®

The grinding of the resin material.

## The awesome white blade of zirconia

Great performance in the grinding of the resin.

- Hybrid resin
- Composite resin
- Tech
- Denture Base Resin
- Thermoplastic resin
- Stent

## Slippery finished surface

Blade back (the surface on which the resin shavings touches the bur after grinding) with a carefully polished one by one. Smoothly discharge the resin shavings and heat.

### “Technology”

Zirconia has good slippery, difficult to hold the frictional heat.

Grinding with high efficiency, and the surface is beautiful.

### “Technology”

## Beautiful cutting surface

We taking advantage of the many years of carbide bur manufacturing know-how, and the pursuit of grinding efficiency and durability, has developed an original blade shape for zirconia.

## Different resin shavings

Compared to resin shavings was grinding with a metal bur, the shavings are not charged with static electricity. Therefore, it can be removed easily shavings only air from the clothes.

Resin shavings is no more clinging to the hands and clothes.

### “Technology”

White with cleanliness.

work position φ (mm)	6
Blade shape	Cross-cut

DD6-Zr20 / DD6-Zr28

## Impressive white

The blade made of zirconia. Without causing a blade to be baked with shavings, it can easily be cleaned with a brush or the like.

### Zirconia Burs

Part No. : DD6-Zr20 (Fine)  
DD6-Zr28 (Super Fine)

Packaging and price :

● 1 pcs = ¥6,500  
(excluding tax)

JAN code :

DD6-Zr20 1 pcs = 4571243041304  
DD6-Zr28 1 pcs = 4571243041311

Before use, please read the package insert of the product.

※Because the color is a print, it will differ slightly from the actual product.  
※Price is the list price.(Consumption tax is not included)  
※List price is a thing of the June 2014 currently.
